

COURSE DETAILS

Units of Credit	6	
Contact hours	4 hours per week	
Class	Tue 3:00PM - 5:00PM	Online
	Wed 2:00PM - 4:00PM	Online
Course Coordinator and Lecturer	Dr Richard Collins Email: richard.collins@unsw.edu.au Office: Room 103 (H22 – Vallentine Annexe) Phone: 9385 5214 (via Teams)	
Course Coordinator and Lecturer	Dr. A. Ninh Pham Email: anninh.pham@unsw.edu.au Office: Room 108 (H22 – Vallentine Annexe) Phone: 9385 5102 (via Teams)	

INFORMATION ABOUT THE COURSE

The course discusses the concepts involved in design of facilities for the treatment of various types of raw water to meet specified water quality including chemical selection, intake and screening, coagulation, flocculation, clarification, filtration, and disinfection unit processes. Advanced treatment processes such as membrane processes, adsorption and ion exchange are also introduced.

HANDBOOK DESCRIPTION

See link to virtual handbook -

<https://www.handbook.unsw.edu.au/postgraduate/courses/2021/CVEN9856>

OBJECTIVES

To provide a sound understanding of the concepts and design principles in both conventional and developing methods of water treatment.

TEACHING STRATEGIES

The teaching strategies that will be used in this course are traditional lecture teaching combined with online workshop and discussion, and independent study.

The approaches to learning are:

Private Study	<ul style="list-style-type: none"> • Review lecture material and textbook • Do set problems and assignments • Join Moodle discussions of problems • Reflect on class problems and assignments • Download materials from Moodle • Keep up with notices and find out marks via Moodle
Lectures	<ul style="list-style-type: none"> • Find out what you must learn • See methods that are not in the textbook • Follow worked examples • Hear announcements on course changes
Workshops	<ul style="list-style-type: none"> • Be guided by Demonstrators • Practice solving set problems • Ask questions
Assessments	<ul style="list-style-type: none"> • Demonstrate your knowledge and skills • Demonstrate higher understanding and problem solving

EXPECTED LEARNING OUTCOMES

This course is designed to address the learning outcomes below and the corresponding Engineers Australia Stage 1 Competency Standards for Professional Engineers as shown. The full list of Stage 1 Competency Standards may be found in Appendix A.

After successfully completing this course, you should be able to:

Learning Outcome		EA Stage 1 Competencies
1.	<i>Identify important water quality parameters and various constituents that affect water quality</i>	PE1.3, PE1.5, PE3.1, PE3.4
2.	<i>Analyse the concepts involved in the design of a conventional water treatment plant</i>	PE1.1, PE1.2, PE1.5, PE2.1, PE2.2, PE2.3, PE3.3
3.	<i>Apply the various advanced treatment methods to produce water of high-quality standards</i>	PE1.1, PE1.3, PE1.5, PE2.1, PE2.2, PE3.3
4.	<i>Design major unit treatment processes in a water treatment plant including intake and screening, coagulation, flocculation, clarification, filtration, disinfection, and residuals management</i>	PE2.1, PE2.2, PE2.3, PE3.1, PE3.3
5.	<i>Develop interpersonal and process management skills in team-work environments and the ability to evaluate and disseminate knowledge and technologies from published literature effectively in a written report</i>	PE1.1, PE1.3, PE1.4, PE3.2, PE3.3, PE3.5, PE3.6

For each hour of contact it is expected that you will put in at least 1.5 hours of private study.

COURSE PROGRAM**TERM 3 2021**

Date	Topic	Lecture Content	Lecturer
13/09/2021 (Week 1)	Introduction to Water Quality & Treatment Processes Intake and Screening	<ul style="list-style-type: none">• Australian Drinking Water Guidelines and water quality parameters• Common & less common undesirable constituents• Unit operations in a conventional WTP and advanced treatment processes• Intake and Screening	Collins
20/09/2021 (Week 2)	Coagulation	<ul style="list-style-type: none">• Surface charge of particles in suspension• Coagulants and mechanisms of coagulation• Coagulation practices	Pham
27/09/2021 (Week 3)	Flocculation	<ul style="list-style-type: none">• Flocculation modelling• Flocculation practices	Pham
04/10/2021 (Week 4)	Clarification	<ul style="list-style-type: none">• Particle settling theory• Conventional sedimentation basin design• Alternative sedimentation processes	Pham
11/10/2021 (Week 5)	Granular Filtration	<ul style="list-style-type: none">• Types of granular filtration• Rapid filtration classification and filter media• Models for rapid filter behaviour• Rapid filter design	Pham
18/10/2021 (Week 6)	<i>Non-teaching week for all courses</i>		
25/10/2021 (Week 7)	Disinfection	<ul style="list-style-type: none">• Disinfection kinetics• Design of disinfection contactors• Disinfection with free and combined chlorine, chlorine dioxide, ozone and UV	Pham
01/11/2021 (Week 8)	Residuals Management	<ul style="list-style-type: none">• Sources and characterization of residuals• Residuals management and process modification	Collins
08/11/2021 (Week 9)	Membrane Processes	<ul style="list-style-type: none">• Membrane classification, properties & configuration• Filtration mechanism, permeate flux and fouling• Process design of membrane filtration	Pham
15/11/2021 (Week 10)	Adsorption and Ion Exchange	<ul style="list-style-type: none">• Fundamentals of adsorption & adsorption isotherms• Powdered and granular activated carbon• Fundamental of ion exchange and mechanisms• Classification & properties of ion exchange media• Ion exchange process configuration	Pham

ASSESSMENT

The Final Examination is worth 50% of the Final Mark, if class work is included, and 100% if class work is not included. The class work is worth 50% of the Final Mark if included. Note that your marks for the class work component of this course will only be included in your Final Mark if you obtain > 40% in the Final Examination. For example, if the Final Exam is marked out of 100, then you must obtain > 40 marks to have your class work marks included in your Final Mark. The formal exam scripts will not be returned but you are permitted to view the marked script. Students who perform poorly in the quizzes and assignment are strongly recommended to discuss progress with the lecturers during the term.

Note: The Coordinator reserves the right to adjust the final scores by scaling if agreed by the Head of School.

Details of each assessment component, the marks assigned to it and the dates of submission are set out below.

Supplementary Examinations:

Supplementary Examinations for Term 3 2021 will be held on Monday 10th to Friday 14th January 2022 (inclusive) should you be required to sit one. You are required to be available during these dates. Please do not to make any personal or travel arrangements during this period.

PENALTIES

Late work will be penalised at the rate of 10% per day after the due time and date have expired. If you require an extension for the submission of your work, you must apply for Special Consideration (please see the website given below). The course coordinators cannot provide you with an extension without you first applying for special consideration. So, please do not ask us directly for an extension on your quiz, assignment, or final exam, we cannot provide you with one.

ASSESSMENT OVERVIEW

Item	Length	Weighting	Learning outcomes assessed	Assessment Criteria	Due date and submission requirements	Deadline for absolute fail	Marks returned
<i>1. Quizzes* – All quizzes are individual assessments</i>							
Quiz 1	45 min (10 questions)	5%	LO1, LO2	Materials presented in weeks 1 to 3 to be assessed	06 th Oct 2021 (online by 11 pm)	Same date as the due date	08 th Oct 2021
Quiz 2	45 min (10 questions)	7.5%	LO1, LO2, LO4	Materials presented in weeks 4, 5 and 7 to be assessed.	07 th Nov 2021 (online by 11 pm)		One week after the due date
Quiz 3	45 min (10 questions)	7.5%	LO1, LO3, LO4	Materials presented in weeks 8 to 10 to be assessed	21 st Nov 2021 (online by 11 pm)		One week after the due date
<i>2. Assignment – Group work assessment (two students per group)</i>							
Design of a conventional WTP	30 page long in total (typed, 12-point, 1.5 line spacing)	30%	LO1, LO2, LO3, LO4, LO5	All materials from weeks 1-10 to be assessed. Details to be given on a separate assignment sheet.	14 th Nov 2021 (via Turnitin by 11 pm)	One week after the due date	Two weeks after the due date
<i>3. Final Exam</i>	2 hr online open book exam	50%	LO1, LO2, LO3, LO4	All lecture materials presented from weeks 1 to 10	During the exam period	N/A	TBA

*Quizzes will be uploaded on UNSW Moodle one week prior to the due dates and will be available for one week. Quizzes are individual assessments which will assess the concepts discussed during lectures and will have short-answer, multiple choice, true-false and/or calculation questions. Students can attempt the quizzes in their own time within that one-week period once. Please ensure that your computer is UNSW Moodle compatible before attempting the quizzes. Please check the following link for system requirement for UNSW Moodle and other information on UNSW Moodle.

<https://student.unsw.edu.au/moodle-support>

Please inform the course coordinator in advance if you are not able to take the quiz in the allotted week or regarding any computing problems. Otherwise, if required, apply for special consideration for an extension (as detailed above).

RELEVANT RESOURCES

No textbook is recommended but material will be drawn from a variety of texts (see additional readings) and lecture handouts.

Additional material will be provided on UNSW - Moodle

Additional Reading (e-books and/or printed copies might be available from the UNSW library):

1. Water Treatment: Principles and Design, 3rd Edition, MWH, Wiley, 2012.
2. Water Quality Engineering: Physical/Chemical Treatment Processes, Benjamin & Lawler, Wiley 2013.

DATES TO NOTE

Refer to MyUNSW for Important Dates available at:

<https://student.unsw.edu.au/dates>

PLAGIARISM

Beware! An assignment that includes plagiarised material will receive a 0% Fail, and students who plagiarise may fail the course. Students who plagiarise are also liable to disciplinary action, including exclusion from enrolment.

Plagiarism is the use of another person's work or ideas as if they were your own. When it is necessary or desirable to use other people's material you should adequately acknowledge whose words or ideas they are and where you found them (giving the complete reference details, including page number(s)). The Learning Centre provides further information on what constitutes Plagiarism at:

<http://www.lc.unsw.edu.au/onlib/plag.html>

ACADEMIC ADVICE

For information about:

Appendix A: Engineers Australia (EA) Competencies

Stage 1 Competencies for Professional Engineers

	Program Intended Learning Outcomes
PE1: Knowledge and Skill Base	PE1.1 Comprehensive, theory-based understanding of underpinning fundamentals
	PE1.2 Conceptual understanding of underpinning maths, analysis, statistics, computing
	PE1.3 In-depth understanding of specialist bodies of knowledge
	PE1.4 Discernment of knowledge development and research directions
	PE1.5 Knowledge of engineering design practice
	PE1.6 Understanding of scope, principles, norms, accountabilities of sustainable engineering practice
PE2: Engineering Application Ability	PE2.1 Application of established engineering methods to complex problem solving
	PE2.2 Fluent application of engineering techniques, tools and resources
	PE2.3 Application of systematic engineering synthesis and design processes
	PE2.4 Application of systematic approaches to the conduct and management of engineering projects
PE3: Professional and Personal Attributes	PE3.1 Ethical conduct and professional accountability
	PE3.2 Effective oral and written communication (professional and lay domains)
	PE3.3 Creative, innovative and pro-active demeanour
	PE3.4 Professional use and management of information
	PE3.5 Orderly management of self, and professional conduct
	PE3.6 Effective team membership and team leadership
